

Baci Daniel Marian

SOFTWARE TESTER/DEVELOPER

Profile

My work experience inside a company is mostly in **testing and requirement writing/validation** but in the last period of time, I've started learning Web Development and starting playing around with Java/Python. I am trying to find a path and start to specialize in the development of applications and I think this can be a good opportunity for me to start my path.

Employment History

Data entry specialist, Orca Book Storage, Poole, United Kingdom
